

Software-Based Extraction of Objective Parameters from Music Performances

Filesize: 8.62 MB

Reviews

These types of book is the greatest ebook readily available. I was able to comprehend every little thing using this published e pdf. I realized this pdf from my dad and i encouraged this publication to discover.

(Dr. Porter Mitchell)

SOFTWARE-BASED EXTRACTION OF OBJECTIVE PARAMETERS FROM MUSIC PERFORMANCES

To download **Software-Based Extraction of Objective Parameters from Music Performances** eBook, remember to follow the web link below and download the file or gain access to other information which are have conjunction with SOFTWARE-BASED EXTRACTION OF OBJECTIVE PARAMETERS FROM MUSIC PERFORMANCES ebook.

Grin Verlag Apr 2009, 2009. Taschenbuch. Book Condition: Neu. 297x210x13 mm. This item is printed on demand - Print on Demand Titel. - Doctoral Thesis / Dissertation from the year 2008 in the subject Musicology, grade: 1.0, Technical University of Berlin, 259 entries in the bibliography, language: English, abstract: Different music performances of the same score may significantly differ from each other. It is obvious that not only the composer s work, the score, defines the listener s music experience, but that the music performance itself is an integral part of this experience. Music performers use the information contained in the score, but interpret, transform or add to this information. Four parameter classes can be used to describe a performance objectively: tempo and timing, loudness, timbre and pitch. Each class contains a multitude of individual parameters that are at the performers disposal to generate a unique physical rendition of musical ideas. The extraction of such objective parameters is one of the difficulties in music performance research. This work presents an approach to the software-based extraction of tempo and timing, loudness and timbre parameters from audio files to provide a tool for the automatic parameter extraction from music performances. The system is applied to extract data from 21 string quartet performances and a detailed analysis of the extracted data is presented. The main contributions of this thesis are the adaptation and development of signal processing approaches to performance parameter extraction and the presentation and discussion of string quartet performances of a movement of Beethoven s late String Quartet op. 130. 200 pp. Englisch.
