

The Directional Calculus; Based Upon the Methods of Hermann Grassmann (Paperback)

Filesize: 2.63 MB

Reviews

This publication is definitely not simple to begin on studying but really exciting to read. It is actually rally fascinating through reading time. Your life span will be enhance when you complete looking at this publication.

(Laurence Littel)

THE DIRECTIONAL CALCULUS; BASED UPON THE METHODS OF HERMANN GRASSMANN (PAPERBACK)

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1890 Excerpt: .about the triangle. (6) Show that the tangent line to the circle of eq. (267) has the equation $r = a(i \cos \phi + i^2 \sin \phi) + w a(i^2 \cos \phi - i \sin \phi)$, of which the scalar form is $r p = a^2$. Also the equations of the tangent and normal to (269) are respectively $(r - e)(p - e) = a^2$ and $(r - e)(p - e) = 0$. (7) Find what the equation $o p = a^2$ represents when p is not the vector to a point on the circle. 84. The parabola. The equations $-r x + y h$ (272) represent a parabola; for, eliminating x , we have which shows that the abscissa varies as the square of the ordinate, a property of the parabola. Differentiating (273), we have a vector parallel to the tangent at the end of p ; hence the equation of the tangent may be written in which y is to be taken as constant. Eliminating y from (273), we have the scalar form of the equation, viz.: or, as it may be written, $p(i^2 - p i^2 - 4 a i i) = 0$. In this latter form we see that the vector $i^2 \cdot p i^2 - 4 a i i$ is always perpendicular to p . Let $r = i^2 \cdot p i^2 - 4 a i i$; then $r i i = -4 a$, and it appears that the locus of the end of r drawn outward from the origin is a right line parallel to i^2 , at a distance of $4 a$ to the left of the origin; also, $r i^2 = p i^2$, so that the projections of p and r on i^2 are equal....
